

Chrysanthemums flowers varieties catalog

Proudly growing

FLOWERS OF
COLOMBIA

Carmel Flowers has been implementing new technology that will improve the overall wellbeing of our labor force and quality of our products while complying with international eco-friendly practices.

The farm recently earned the Rainforest Alliance certification, as well as purchased newly renovated coolers with cross-docking for controlled temperature container loading.

The company's facilities are located at 2,103 meters (6,900 feet) above sea level in Rionegro, Antioquia, where the average temperature is 63° F (17.4° C), which is ideal for growing Chrysanthemums. We are located ten minutes away from the Jose Maria Cordova International Airport, an excellent location for handling and delivering the freshest cut flowers.

At the moment, we export to North America (Canada & USA) and Chile.
